

People serving Science,
Science serving People

who we are

We are one of the few established international providers capable of supplying Cardiac Safety, Central Imaging, Endpoint Adjudication and eCOA solution services to pharmaceutical, medical device and biotech companies, CROs and nonprofit organizations. Our medical and regulatory expertise, quality-driven approach and team availability make us a key player for clinical trials.

our mission

Our mission is to help our client invent tomorrow's healthcare by using qualitative, reliable and innovative solutions in early to late stage clinical trials.

our vision

"We never forget that behind the numbers, metrics and data flows, there are patients. »

Dr. Pascal Voiriot, Founder

global presence

We conduct clinical trials of the highest quality and in the least amount of time to secure regulatory approval and ultimately bring your solutions to market for the benefit of patients worldwide.

We are particularly involved to spread our know-how over the world, including in emergent countries to support the research for neglected diseases.
